

# MobilCLAMP

Article Nr.: ZMC 200

Introducing, the new innovative **MobilCLAMP** from BDS Maschinen GmbH – Germany. The MobilCLAMP is a portable and lightweight clamping device which converts a magnetic drilling machine into a bench type drilling machine. The innovative MobilCLAMP transforms the magnetic drilling machine into a flexible, portable and mobile bench drill.

The highlight here is the easy positioning of the magnetic drilling machine on the MobilCLAMP. No screws have to be tightened and no connections to be fixed! It is sufficient to place the magnetic drilling machine on the MobilCLAMP and activate the magnet of the magnetic drilling machine. A perfect and secure connection for the magnetic drilling machine and the MobilCLAMP is created. So this now gives you a very practical solution for an everyday problem.

## Directions for using a Magnetic Drilling Machine as a Bench Drilling Machine?

1. Get a MobilCLAMP innovative drill stand.
2. Attach a Prism Vise to the MobilCLAMP.
3. Place the magnetic drilling machine on the MobilCLAMP.
4. Switch on the magnet of the magnetic drilling machine. And you are ready to use the Magnetic Drilling Machine as a Bench Drilling Machine!
